

Assistance with

Adaptations

Do you own your home?

Do you rent privately?

Do you rent from the Council?

Or from the Housing Association?

Introduction

This leaflet is for people living in Orkney who would benefit from adaptations to their home.

It explains how to make your home suitable for someone with mobility problems or a disability whether you:

- Own your own home (or are in the process of buying).
- Rent from a private landlord.
- Rent from Orkney Islands Council .
- Rent from Orkney Housing Association Ltd.
- Other.

What is an adaptation?

An “adaptation” covers a range of changes or alterations to a property that can help make the day to day living of someone who is disabled or has difficulties due to age, impairment, ill health, or a traumatic injury.

Orkney Health & Care Occupational Therapists can assess you for assistance with equipment, small adaptations and major adaptations, depending on your individual circumstances.

Each assessment is given a priority rating - for example, urgent works which are preventing a hospital discharge (or a possible hospital admission) will be given greater priority.

If you require assistance with repairs, improvements, energy advice or other works please speak to your landlord or if you live in a private sector property please contact Orkney Care & Repair who deliver “Scheme of Assistance”.

I need a small adaptation or piece of equipment to help me with my day to day living.

Items of equipment such as shower stools and small adaptations such as grab rails are available to help you manage more easily at home.

Usually an Occupational Therapist will help you look at what is causing difficulty. They can provide information and advice or arrange for an appropriate service to deliver equipment, or install an appropriate adaptation.

However, for many minor adaptations you can refer yourself for help and may not need to wait for an Occupational Therapist to visit;

Initially contact your landlord:

- Orkney Islands Council.
- Orkney Housing Association.
- Or private sector tenants/owner/occupiers; Orkney Care & Repair.

Selbro Resource Centre

Selbro Resource Centre is run by “Orkney Health & Care” and is open to the public from 2-4pm every Wednesday where you can discuss your needs face to face with an Occupational Therapist, and try out some of the equipment on display.

If you have problems with your sight or hearing you will be able to speak with the Rehabilitation Officer for Sensory Impairment.

Care & Repair is also available to give advice and help with adaptations and repairs to your home.

Selbro is situated on Scott’s Road, Hatston, Kirkwall. KW15 1GR

You will find it has easy access with lots of parking space.

My home needs a major adaptation to make it suitable for me

If you require more significant adaptations such as a level access shower, alternative toilet facilities, stair lift, ramps, etc. then an Occupational Therapist will visit and provide a full assessment of your needs.

Their recommendations will include the works required to improve safety and access inside or outside your home.

If you rent a property from the Council or Housing Association the Occupational Therapist will advise your landlord of your requirements and request appropriate works to be carried out.

If you are in privately rented property or own your own house then grants from 50-100% may be available if you are in receipt of appropriate benefits. Orkney Care & Repair will assist you to access help from the "Scheme of Assistance".

This service can:

- Advise and help with an individually tailored programme of adaptations.
- Give an idea on how much the works will cost.
- Help you find suitable builders.
- Assist you to fill in forms and organise paperwork.
- Help to organise plans and specifications.
- Advise and help to compile a financial package that will enable the works to proceed; including application for appropriate grants and loans.
- Help you cope while the works are being done.
- Advise and help with alternative solutions if required.

In some cases proposals may not be sustainable, circumstances might change, or the property might suffer deterioration, in which case you may wish to discuss alternatives including leaving an unsuitable property and living elsewhere.

Further information on Housing Options is available from Orkney Islands Council.

Other Advice and Information:

For **repairs** and other issues related to a tenancy please contact your landlord in the first instance.

Please use the following links:

[Orkney Islands Council](#)

[Orkney Housing Association Ltd.](#)

[Orkney Care and Repair](#)

Care and repair small repairs service carry out minor works of repair, maintenance or adaptation for private sector householders who are elderly or who have a disability.
